FY2004	ITC136	Photovoltaics & Wind Power	This course will define the design and installation of photovoltaic and wind power systems. Emphasis will be placed on electrical safety and operation of trade tools and equipment and job site safety. Topics covered: photovoltaic and wind power system plans, safety, electrical materials and fittings, solar cell panel and wind generator wiring techniques, battery systems, inverters and charge controllers. Three lecture.	-	3	16	83%	3.2	\$111 - \$528	\$10
FY2004	ITC140	Blue Print Reading/Estimating	Reading construction blueprint documents and estimating the amount of building materials needed for building projects. Reading and interpreting architectural schedules, symbols, and specifications. Three lecture.	-	3	15	73%	3.0	\$111 - \$528	\$5
FY2004	ITC145	Sheet Metal I	History and background of the sheet metal apprentice. Basics of drafting, layout and pattern development used in the sheet metal trade. Prerequisite: Indentured Apprentice with the Phoenix Sheet Metal Joint Apprenticeship and Training Committee. Five lecture.	-	5	3	100%	1.0	\$185 - \$880	-

FY2004	ITC146	Sheet Metal II	The importance of time management. Layout and pattern development. Use of power equipment and common sheet metal materials, trade mathematics and orientation to air flow movement. Prerequisite: ITC 145, Indentured Apprentice with the Phoenix Sheet Metal Joint Apprenticeship and Training Committee. Five lecture.	-	5	3	100%	1.0	\$185 - \$880	-
FY2004	ITC149	Sheet Metal V	Intermediate drafting skills with more complicated pattern layout development. Operation and safety methods for hand operated shop machines. Use of special materials. Introduction to the use of formulas. Prerequisites: ITC 148, Indentured Apprentice with the Phoenix Sheet Metal Joint Apprenticeship and Training Committee. Five lecture.	-	5	3	67%	1.0	\$185 - \$880	-
FY2004	ITC170	Plane Survey & Build. Layout	Building layout and surveying to establish building location for excavation and for the accurate placement of the building foundation, including finish floor elevation. Three lecture.	-	3	13	85%	2.6	\$111 - \$528	\$5
FY2004	ITC180	Bldg Construction Methods I	Floor foundations and interior and exterior framing, including various types and methods of building foundations and framing systems. Three lecture.	-	3	41	68%	8.2	\$111 - \$528	\$15
FY2004	ITC185	Bldg Construction Methods II	Methods, materials, and safe working practices as they relate to balloon, platform, and post and beam construction using wood or wood products. Floor, interior and exterior walls, ceilings, and a general introduction to roofs as they connect or relate to framing types. Three lecture.	-	3	14	86%	2.8	\$111 - \$528	\$5
FY2004	ITC210	Struct Design & Bldg Materials	Structural analysis in building design, basic relationships between structures and architectural form, principles, concepts, and procedures from statics and mechanics of materials, and analysis of reactions including shear, deflection, flexural, and shearing stresses. Prerequisite: MAT 121 or placement. Three lecture.	-	3	3	100%	0.6	\$111 - \$528	\$5

FY2004	ITC220	Framing-Walls, Roofs & Decks	Rough frame, post and beam, heavy timber construction theory and construction methods. Basic framing tables, roof structures, rafter frame tables, span tables and the construction codes involved in most framing projects. Tools used in the framing industry, such as the framing square and nail gun. Stair building and the different types of lumber used and grading systems. Prerequisite: Registered Apprentice Status or permission of the Apprenticeship Coordinator. Three lecture; four lab.	-	5	8	50%	2.7	\$185 - \$880	\$10
FY2004	ITC221	Carpentry Industry Technology	Carpentry industry technology used in the construction of building and other projects that define the professional carpenter. The use of scaffold, scaffold systems in various applications and the certification needed to meet the current OSHA regulations. The use of rigging tools and technology. The use of the builder's level, transit level and the application to building layout in construction. Prerequisite: Registered Apprentice Status or permission of the Apprenticeship Coordinator. Three lecture; four lab.	-	5	9	89%	3.0	\$185 - \$880	\$10
FY2004	ITC222	Interior Systems	Materials, systems and the technology used in the interior construction of modern buildings. Metal stud construction, acoustical ceilings, pedestal floors, and clean room facilities, make up part of this growing industry. Tools, materials and the methods needed to construct interior systems used in commercial and industrial buildings. Prerequisite: Registered Apprentice Status or permission of the Apprenticeship Coordinator. Three lecture; four lab.	-	5	6	67%	2.0	\$185 - \$880	\$10

FY2004	ITC223	Interior Finish	Door hanging, finish hardware, and window installation, interior stairs, cabinets, shelving, moldings, casings and plastic laminates are included in this course. Interior finish tools, materials and procedures needed to perform finish carpentry. Prerequisite: Registered Apprentice Status or permission of the Apprenticeship Coordinator. Three lecture; four lab.	-	5	12	75%	4.0	\$185 - \$880	\$10
FY2004	ITC235	Innov & Altern Bldg Techniques	Innovative and alternative building techniques such as steel framing, SIP, Integra or Rastra block, adobe, earth brick, rammed earth, cast earth, sand bag, papercrete, straw bale and earth ship will be presented along with environmental and aesthetic design considerations. These concepts will be integrated with a "pattern language" and passive solar design approach for student design projects. Three lecture; one lab. May be taken for S/U credit.	-	3	11	64%	2.2	\$111 - \$528	\$15
FY2004	ITC245	Sheet Metal VI	Advanced layout and pattern development. Use of special sheet metal power equipment. Also, trigonometric functions as applicable to the sheet metal trade and basic principles of refrigeration and air conditioning, field installation procedures. Prerequisites: ITC 149, Indentured Apprentice with the Phoenix Sheet Metal Joint Apprenticeship and Training Committee. Five lecture.	-	5	2	100%	0.7	\$185 - \$880	-
FY2004	ITC246	Sheet Metal VII	Various types of formulas and functions. Moving heavy equipment and planning a duct job in the field. Requirements, types, seams, and locks for architectural sheet metal are covered. Also, blueprint reading, residential heating and air conditioning, and blowpipe systems. Prerequisites: ITC 245, Indentured Apprentice with the Phoenix Sheet Metal Joint Apprenticeship and Training Committee. Five lecture.	-	5	2	100%	0.7	\$185 - \$880	-
